

## A Rare Opportunity To Join Us

versaSRS is a proven, scalable, stable and highly flexible enterprise software solution for service request & business workflow management. A highly configurable framework, with optional integration & deployment within MS Azure and MS technologies.

### Discover Software as a Solution

versaSRS fills the gaps for many organisations who run disparate and unconnected workflow, communication and request management systems. The solution creates transparency and standardisation of business processes.

With over 30 modules, the software produces improved outcomes and cost-effectiveness for customers that easily outweigh its closest competitors.

### Provide Measurable Returns

Offer your customers a unique, flexible and scalable platform for immediate ROI.

### Grow Your Business Services

Expand your solution set with Microsoft accredited developers to offer a 100% fit for your customers.

### Join Our Partner Network

Join us as a sales partner, technology partner or referrer.

## The Benefits

By becoming a versaSRS partner you can reap the fruits of our experience, expertise and reputation. Our partners enjoy various benefits such as a discount program with healthy margins, extended in-house Not-For-Resale versions of versaSRS, promotional material, priority support and a person account representative.

## How To Join?

Joining the partner network is easy and there are no joining fees. Visit

## Providing A 100% Fit Every Time

Our strength is our team and its ability to quickly respond to a customer's ever changing business's needs. Our philosophy is to deliver our customers with excellence. We understand that business requirements need attention to detail, an emphasis on quality and a quick turnaround.

versaSRS is delivered via a web browser, yet it offers a look and feel users would expect from a thick-client desktop application. Browser delivery allows our software to be easily deployed and updated from a central location. This reduces the need for IT specialists deploying patches through planned outage.

Our solutions can support businesses of any size, whether they are a multi-national enterprise customer or simply growing an idea. We can deliver a range of solutions to improve business processes and business critical applications.

As a Microsoft Certified Partner our software solutions are built on fully scalable Microsoft Technologies. Our systems interface with email gateways and can extract contact data via Active Directory and ERP vendor data.

We can also provide data migration services through consultation for bringing the data across to our solutions. We can

archive data to improve the database performance when it grows with your usage through other areas of your business. This ensures that you can keep databases to an optimal size and performance is maintained.

The capacity handling of our solution, its ability to grow with your business, to provide visibility of key activities, and meet key business deliverables is at the core of the solution. versaSRS meets audit and compliance requirements to reduce the risk within a complex business structure. With that in mind our products are truly scalable.
